PHYSICAL REVIEW JOURNALS

2020 Catalog: At a Glance
The *Physical Review* journals offer significant value, trusted quality through rigorous peer review, and broad topical coverage, as well as a variety of open access options for authors.

All other data provided by the American Physical Society.
World-leading multidisciplinary journals covering all of physics and related research areas

**PHYSICAL REVIEW LETTERS** (PRL)
The most-cited journal in physics
journals.aps.org/prl  |  @PhysRevLett
PRL is the world’s premier physics letter journal and APS’s flagship publication. It has published seminal research by Nobel Prize winners and other distinguished researchers in all fields of physics, and as the highest-impact journal participating in SCOAP³, it publishes high-energy physics research open access, at no cost to authors.

**REVIEWS OF MODERN PHYSICS** (RMP)
The most-cited physics review journal
journals.aps.org/rmp
As the world’s premier physics review journal, RMP publishes in-depth reviews that provide outstanding coverage of a topic from the leading experts in that area, and give context and background for current research trends.

**PHYSICAL REVIEW X** (PRX)
The highest-impact open access physics journal
journals.aps.org/prx  |  @PhysRevX
PRX publishes a select set of papers from all areas of pure, applied, and interdisciplinary physics that have the potential to influence current and future research.

**PHYSICAL REVIEW RESEARCH** (PRRESEARCH)
Open access and covering all topics of interest to physicists
journals.aps.org/prresearch  |  @PhysRevResearch
New in 2019, PRResearch is a fully open access, peer-reviewed journal welcoming the whole spectrum of research topics of interest to the physics community and offering authors and readers the Physical Review experience and quality they value and trust.
Trusted topical titles celebrating 50 years of serving key physics research communities

PHYSICAL REVIEW A (PRA)
The most-cited AMO physics journal
journals.aps.org/pra | @PhysRevA
PRA publishes important developments in the rapidly evolving areas of atomic, molecular, and optical (AMO) physics, quantum information, and related fundamental concepts.

PHYSICAL REVIEW B (PRB)
The most-cited condensed matter journal
journals.aps.org/prb | @PhysRevB
The world’s largest physics journal, PRB provides outstanding depth and breadth of coverage of condensed matter physics, combined with context and background for ongoing research.

PHYSICAL REVIEW C (PRC)
The most-cited nuclear physics journal
journals.aps.org/prc | @PhysRevC
PRC publishes more than two-thirds of the world’s research in theoretical and experimental nuclear physics, and as a participant in SCOAP³, it provides open access publishing for the high-energy physics community at no cost to authors.

PHYSICAL REVIEW D (PRD)
The most-cited particle physics journal
journals.aps.org/prd | @PhysRevD
PRD covers research in elementary particle physics, field theory, gravitation, and cosmology, and as a participant in SCOAP³, it provides open access publishing of high-energy physics at no cost to authors.

PHYSICAL REVIEW E (PRE)
The most-cited mathematical physics journal
journals.aps.org/pre | @PhysRevE
PRE is a broad and interdisciplinary journal focusing on collective phenomena of many-body systems in the interrelated areas of statistical, nonlinear, biological, and soft matter physics. PRE covers recent developments in complex fluids, polymers, liquid crystals, and granular materials.
Newer titles focused on emerging areas and research communities that span across and beyond physics, including applications, technology, engineering, and education

**PHYSICAL REVIEW APPLIED** (PRAPPLIED)
High-impact letters, articles, and reviews
journals.aps.org/prapplied | @PhysRevApplied

PRApplied publishes papers that bridge the gap between engineering and physics, and between current and future technologies. PRApplied welcomes applied research from across the physical sciences and technology communities in academia and industry.

**PHYSICAL REVIEW MATERIALS** (PRMATERIALS)
Celebrating its first Impact Factor
journals.aps.org/prmaterials | @PhysRevMater

PRMaterials serves the multidisciplinary materials community working on the prediction, synthesis, processing, structure, properties, and modeling of a wide range of materials.

**PHYSICAL REVIEW FLUIDS** (PRFLUIDS)
Serving the international fluid dynamics community
journals.aps.org/prfluids | @PhysRevFluids

PRFluids is dedicated to publishing innovative research that significantly advances the fundamental understanding of fluid dynamics. PRFluids embraces both traditional fluid dynamics topics and newer areas.

**PHYSICAL REVIEW ACCELERATORS AND BEAMS** (PRAB)
Innovative open access since 1998
journals.aps.org/prab | @PhysRevAB

PRAB covers the full spectrum of accelerator science, technology, and applications, including subsystems, component technologies, beam dynamics, and the design, operation, and improvement of scientific and industrial accelerators of all types.

**PHYSICAL REVIEW PHYSICS EDUCATION RESEARCH** (PRPER)
The world’s only open access journal in physics education research
journals.aps.org/prper | @PhysRevPER

PRPER covers the full array of experimental and theoretical research relating to the teaching and learning of physics and astronomy.
Why Publish in the Physical Review Journals

OPEN ACCESS OPTIONS FOR ALL AUTHORS
The fully open access Physical Review journals – including PRX, the world’s highest-impact open access physics journal – make all articles immediately free to read online under a CC-BY license upon payment of an article publication charge (APC). This maximizes readership and citations, and thus visibility and impact, for researchers and their work.

The hybrid journals in the Physical Review family include some of the most-cited journals in the world. These offer authors a gold open access option, which makes the article version of record immediately free to read online under a CC-BY license upon the payment of an APC.

For authors without funding for APCs, the hybrid journals also allow self-archiving of the accepted manuscript in non-commercial repositories, which meets the requirements of most funders’ and institutions’ green open access policies. Several of these journals are participants in SCOAP$^3$ and publish high-energy physics research open access under a CC-BY license at no cost to authors.

BY SCIENTISTS, FOR SCIENTISTS
All Physical Review journals are shaped by scientists to serve the research community. This commitment ensures that the journals’ mission and standards prioritize the needs of researchers and authors.

HIGH VISIBILITY AND IMPACT
Authors achieve high visibility and broad dissemination of their work by publishing in the Physical Review journals. Editors bring attention to outstanding research and convey its importance through a number of features.
