The Physical Review journals offer significant value, trusted quality through rigorous peer review, and broad topical coverage, as well as a variety of open access options for authors.

### Why Publish in the Physical Review Journals?

#### OPEN ACCESS OPTIONS FOR ALL AUTHORS

The fully open access Physical Review journals make all articles immediately free to read online under a CC-BY license upon payment of an article publication charge (APC). This maximizes readership and citations, and thus visibility and impact, for researchers and their work.

The hybrid journals in the Physical Review family include some of the most-cited journals in the world. These offer authors a gold open access option, which makes the article version of record immediately free to read online under a CC-BY license upon the payment of an APC.

For authors without funding for APCs, the hybrid journals also allow self-archiving of the accepted manuscript in non-commercial repositories, which meets the requirements of most funders’ and institutions’ green open access policies. Several of these journals are participants in SCOAP3 and publish high-energy physics research open access under a CC-BY license at no cost to authors.

#### BY SCIENTISTS, FOR SCIENTISTS

All Physical Review journals are shaped by scientists to serve the research community. This commitment ensures that the journals’ mission and standards prioritize the needs of researchers and authors.

#### HIGH VISIBILITY AND IMPACT

Authors achieve high visibility and broad dissemination of their work by publishing in the Physical Review journals. Editors bring attention to outstanding research and convey its importance through a number of features.
